

After creating new react app and installed React-Bootstrap and font awesome
Create

<input type="text" value="Search..."/>	
Name	Price
Fruits	
Apple	\$1
Dragonfruit	\$1
Passionfruit	\$2
Vegetables	
Spinach	\$2
Pumpkin	\$4
Peas	\$1

Using component based arch, break the UI to small component and by pass the states using props

Search input is for products in the category

Add remove button for each Category to remove all products with its category

Use this data

```
[
  { category: "Fruits", price: "$1", stocked: true, name: "Apple" },
  { category: "Fruits", price: "$1", stocked: true, name: "Dragonfruit" },
  { category: "Fruits", price: "$2", stocked: false, name: "Passionfruit" },
  { category: "Vegetables", price: "$2", stocked: true, name: "Spinach" },
  { category: "Vegetables", price: "$4", stocked: false, name: "Pumpkin" },
  { category: "Vegetables", price: "$1", stocked: true, name: "Peas" }
]
```

Let's Do it 😊😎
